

ELEVATION<sup>PLUS</sup>

logiflex

# ELEVATION<sup>PLUS</sup>

Elevation Plus is the ergonomic solution for flexible, comfortable work. It's fast, powerful and silent, with a synchronized multi motor system and collision detection.

Each surface is equipped with an electrical control panel and can be raised or lowered between seated and standing positions in a matter of seconds.

Elevation Plus allows the user to assume the posture they prefer, depending on the task at hand, their energy level or their mood.

The result? A healthier, more productive work environment.

## BENEFITS OF A HEIGHT ADJUSTABLE TABLE

### POSTURE

Proper worksurface height while sitting or standing promotes good posture and prevents back pain.

### PRODUCTIVITY

Many people find that the ability to switch back and forth between sitting and standing work helps them maintain focus and keep their energy up all day long.

### HEALTH

Studies have shown that spending a few hours a day in a standing position helps to maintain and improve health, and eliminates some of the health risks linked to sedentary habits.

## PRIVATE OFFICE

Private office configurations in the Elevation Plus collection include L-shaped layouts and various modesty panel options. Elevation Plus can be used in combination with other Logiflex collections such as Volt, Millennium or Level.

The Volt collection also includes box drawers, file drawers, trash cans and recycling bins as well as cabinets and bookshelves.

## BENCHING

Specify our height adjustable tables for open-space benching layouts. Acrylic and tackboard dividers are available to manage social distance and privacy. Elevation Plus also provides workstation electrification and wire management solutions.

Knowing that health and safety is the priority, add divider screens. The higher, the wider and the more easily cleaned, the better.

# WIRE MANAGEMENT

## 1 WIRE MANAGEMENT

Power and networking cables are stored in the laminate power beam for easy management and are accessible via a removable top.

## 2 FABRIC SLEEVE

Fabric sleeves are used to organize cords under the work surface, preventing tangled wires. Simply fastened with a single screw.

## 3 CONTROLLER

All Elevation desks include a digital display controller. This panel also offers three programmable memory settings.

# FEATURES THAT MAKE A DIFFERENCE

## CONTROL BOX

Equiped with a 70" or 108" Power cord.

## GROMMET

(Optional)

## CONTROLLER

The controller can save three programmable height settings. Can be positioned left or right.

## CONNECTIVITY UNIT

(Optional)

## FABRIC SLEEVE

Can be finished with any fabric available from one of our fabric partners.

## MOTORS

Two or three motors, depending on the configuration, will adjust the workstation to the desired height.

## FEATURES

Height from 24.5" to 50"

Depths of 23" or 29"

Width from 46" to 70"

Maximum workstation capacity : 320 lbs

Maximum workstation capacity with return : 400 lbs

## COLLISION PROTECTION

Elevation Plus tables have an integrated anti-collision mechanism. Activated when the surface detects resistance, the movement is stopped and retracted to prevent damage.
